SCAVENGER HUNT

SNAP A PHOTO OF ALL 5 CHALLENGES, THEN POST USING **#SeaTurtleHospitalScavengerHunt** AND TAG US ON FACEBOOK OR INSTAGRAM TO BE ENTERED TO WIN A REUSABLE BAG AND STAINLESS-STEEL STRAW FROM OUR GIFT SHOP!

To be entered into the drawing to win the reusable tote and straw, you must complete each challenge and submit your photos by 5 p.m. Monday, June 15. Drawing will take place on Tuesday, June 16, World Sea Turtle Day.

On June 8th each year we celebrate World Ocean's Day. Scientists have documented the healing effects of being in or even near water particularly lakes and oceans. The first **conservation challenge** is to **take a picture of yourself on, in, or near a body of water.**

Every year millions of tons of garbage end up in our rivers, lakes, streams, and oceans. We can stand up as stewards of our planet and be part of the solution to this problem. This **conservation challenge** is to conduct your own mini cleanup in your neighborhood, a nearby park, the beach, or forest. Safely collect trash that would be bad for wildlife or the habitat you are cleaning. **Take a picture of 5 pieces of trash that you find that could be harmful for wildlife.**

This **copycat challenge** is fun for everyone. Get the whole house involved! Act out the below picture with your friends and family and pets and props you find around your home. **Take a picture of your rendition of this picture to share.**

This challenge focuses on changes you have already taken in your day to day life to improve the health of our planet. Plastics are made from petrochemicals which are nonrenewable resources. By choosing to say "no" to single-use plastics in your daily life, you are standing up for our planet. **Take a picture of some ways you help to protect our planet and all its inhabitants.**

For the final challenge you will need to **channel your creativity to create your very own sea turtle model.** Your sea turtle can be made from craft supplies or items you have lying around the house. They can be baked or made out of food. You can even construct them from natural items you collected legally in nature. So, get creative and make a sea turtle!
