TATER TOT'S STORY

Tater Tot is a young green sea turtle that was found stranded on Vilano Beach, Florida. This little turtle was cold upon arrival at the Sea Turtle Hospital and needed to be slowly warmed back up. Tater Tot also had small fibropapilloma (FP) tumors. Fortunately, we were able to get this animal healthy quickly and after a couple of small tumor removal surgeries, Tater Tot was ready to return home. Tater Tot was released at the River to Sea Preserve in Palm Coast, Florida.
