ABOUT WASHBACKS

Washbacks are young sea turtles living in the ocean that have been pushed back to beaches by strong wind and waves. These little turtles are tired and require rest. If you find any sea turtle washbacks on the beach, here’s how you can help: Please do not put them back into the ocean. Call FWC at 888-404-3922 and they will let you know where to take the turtle. When they are brought to a rehab facility, keep them in a damp container and away from air conditioning.
