

JAMES C. LIAO, Ph.D.
Associate Professor of Biology

Since the time of Aristotle, we have marveled at the ability of animals to run, fly and swim. These behaviors are the product of the interaction between the intent of the organism and the physics of the world they inhabit. How can sailfish reach swimming speeds of 68 miles per hour? How can seabirds fly 40,000 miles each summer in search of food? More and more, we are looking at how animals sense and navigate their environment to provide inspiration for designing better planes, ships and robots. We have active research interests in the following topics:

BIOMECHANICS: We are interested in the mechanics, energetics and control of how fish swim in natural flow conditions. Fishes routinely encounter unsteady flows in nature, such as when schooling or swimming behind a rock in a stream. Our approach is to expose fish to unsteady flows found in the characterized wakes of simple objects such as cylinders. By systematically altering vortex size, spacing, and shedding frequency, we have found that fish can extract energy from their environment and save energy by swimming in turbulent flows. Our current work looks to understand the role of body shape, flexibility and kinematics in exploiting flows under more complex hydrodynamic habitats.

NEUROSCIENCE: Animals must accurately sense their environment in order to translate them into appropriate motor behaviors. In fishes, hair cells of the lateral line system enable the ability to sense water flow during important behaviors such as catching food or escaping from predators. Our lab takes advantage of optical, genetic and electrophysiological techniques available in zebrafish to examine the organization and physiology of neurons involved in flow sensing and locomotion. Advances in zebrafish genetics allow us to use powerful techniques to monitor the connectivity and function of neurons in an intact, behaving animal.

MOVEMENT ECOLOGY: We track and monitor red drum movement and migration patterns in Northeast Florida via acoustic telemetry. Red drum (*Sciaenops ocellatus*) are known to aggregate in St. Augustine for spawning each year. Despite this species' economical and ecological importance, the local residency patterns of reproductively active fish are poorly known. Our goal is to better understand local fish habitat usage so we can unlock the mysteries of migration. We are part of the *iCoast* UF Moonshot Initiative and the FACT (Florida Atlantic Coast Telemetry Network), a network that provides access to over a thousand acoustic receivers located from Cuba to Nova Scotia.

Education:

- 2003-2004 Ph.D. Harvard University, Cambridge, MA
1999-2003 M.A. Harvard University, Cambridge, MA
1993-1996 B.A. Wesleyan University, Middletown, CT *magna cum laude*

Employment:

- 2016- Associate Professor, Department of Biology UF, Whitney Laboratory for Marine Bioscience
2015- Affiliate Professor, Clayton Pruitt Family Department of Biomedical Engineering, UF
2011- Research Associate, Division of Vertebrate Zoology, American Museum of Natural History
2009-2016 Assistant Professor, Department of Biology UF, Whitney Laboratory for Marine Bioscience
2009- Affiliate Assistant Curator of Ichthyology, Florida Museum of Natural History
2007-2008 Research Associate, Department of Neurobiology, Cornell University
2004-2007 NIH NRSA Postdoctoral Fellow, Cornell University

Honors:

- 2016 University Term Professor (2016-2019)
2015 Blavatnik Award for Young Scientists, UF Nomination
2004 Elsevier Young Investigator Award, 2nd place, Society for Experimental Biology
2003 Derek Bok Certificate of Excellence in Teaching, Harvard University (1999-2003)
2003 Stoye Award, American Society for Ichthyologists and Herpetologists
2003 Robert A. Chapman Memorial Scholarship, Harvard University

Research Interests:

- Neurobiology of sensory and motor systems
Biomechanics of aquatic locomotion
Ecology, evolution and behavior of fishes

Professional Societies:

- Association for Research in Otolaryngology
Society for Integrative and Comparative Biology
International Society for Neuroethology

Grants:

- 2021 Elizabeth and John Taylor Foundation: Acoustic telemetry for marine fish conservation (\$50,000, 1 year, PI)
2021 NSF Physics of Living Systems (POLS): Schooling through vortex streets: a biological and computational approach to understanding collective behavior in wild fish (\$540k, 3 years, PI)
2021 Anonymous Foundation- *iCoast*: Unlocking the secrets of migration: real-time tracking of large marine animals for conservation (\$188k, 1 year, PI)
2020 Anonymous Foundation- *iCoast*: Unlocking the secrets of migration: real-time tracking of large marine animals for conservation (\$260k, 1 year, PI)
2019 Patagonia Conservation Grant. Redfish Conservation in Northeast Florida (\$20k for 1 year, PI)
2019 Anonymous Foundation- Unlocking the secrets of migration: real-time tracking of large marine animals for conservation (\$60k, 1 year, PI)
2019 NSF IOS Animal Behavior- Flexibility and robustness of attack and evasion: reverse-engineering the mechanisms of behavioral control (\$620k, 3 years, co-PI)
2019 UF iCoast: A 21st century coastal monitoring network (\$750,000 for 2 years, co-PI Whitney Lab)
2019 UF SEED Grant- Karman gait ladders for improving fish passage (\$100k, 2 years, co-PI)
2018 Private Foundation- Unlocking the secrets of migration: real-time tracking of large marine animals for conservation (PI, \$120,000, 01/01/18-01/01/20)
2016 NIH RO1 NIDCD-Organization and functional of lateral line afferents-Amendment. (PI, \$32,382, 7/1/16 – 6/30/18)
2013 NSF IOS- Single neuron resolution of flow sensing in the zebrafish lateral line during development (sole PI, \$516,083, 7/1/13-6/30/16)
2010 NIH RO1 NIDCD- Organization and functional of lateral line afferents (sole PI, \$1.73 million, 7/1/10-6/30/15)
2010 UF Office of Research- South East Neuroscience Conference (\$3000)
2004 National Institutes of Health NRSA Postdoctoral Fellowship (\$122,700, 11/1/04-10/31/07)
2002 Sigma Xi Grants in Support of Research (\$3000)
2002 Lerner-Gray Fund, American Museum of Natural History (\$3000)
2000 Putnam Expedition Grant, Harvard Museum of Comparative Zoology (\$2,600)
2000 Bermuda Biological Station Grant in Aid of Research (\$1600)
1995 Howard Hughes Undergraduate Summer Scholarship (declined)
1993-96 Charles Ray Scholarship and Wesleyan Scholarship, Wesleyan University

1991-15 Awards < \$1500: UF Faculty travel award, Harvard University Graduate Student Council Travel Award, SICB Grants in Aid of Research, ASIH Student Travel Award, Mote Marine Laboratory Scholarship, The School for Field Studies Scholarship

Liao J.C. and Lauder G.V. 2000. Function of the heterocercal tail in sturgeon, *Acipenser transmontanus*. American Society of Ichthyologists and Herpetologists, La Paz, Mexico.

Liao J.C. and Lauder G.V. 2000. Wake dynamics of the heterocercal tail in freely-swimming sturgeon, *Acipenser transmontanus*. Society for Integrative and Comparative Biology, Atlanta GA.

Liao J.C. and Lauder G.V. 1999. Wake dynamics of the heterocercal tail in freely-swimming sturgeon, *Acipenser transmontanus*. Division of Vertebrate Morphology, Regional Meeting, Brown University.

Teaching:

- 2023 Invited lecture, Academy of Aquaculture at St. Johns Technical High School
- 2022 Instructor, *Neurophysics of Locomotion*, UC Santa Barbara Advanced School of Quantitative Biology/ Kavli Institute for Theoretical Physics (5 week summer course).
- 2022 Biomechanics in Unsteady Flows. Comparative Biomechanics, Chapman University.
- 2022 Invited Lecture: Research from a Marine Biologist, Class 4, Chapin School NYC, all-girls independent K-12 day school (01/28/2022)
- 2021 Guest Lecture, Auditory Pharmacology/Advanced Topics in Audiology, 11/15/21, UF College of Public Health & Health Professions
- 2020 ZOO: PCB4460/6456C: *Ichthyology*, Semester of Immersion, UF Dept of Biology (4 credit class)
- 2018 Instructor, *Neurophysics of Sensory Navigation*, Santa Barbara Advanced School of Quantitative Biology/ Kavli Institute for Theoretical Physics.
- 2018 Mentor NSF summer REU student Katie Stokes
- 2018 ZOO: PCB4460/6456C: *Ichthyology*, Semester of Immersion, UF Dept of Biology (4 credit class)
- 2017 Mentor, NSF summer REU student Lauren Lubeck
- 2017 GMS 6070-2B96 *Sensory Biology* UF Dept of Pharmacology
- 2016 ZOO 4926 *Science Communication: Acting for Scientists*. UF Dept of Biology (1 credit class)
- 2016 Graduate Orientation Seminar Parade of Faculty, UF Dept of Biology
- 2015 Mentor, NSF summer REU student Joy Putney
- 2015 Graduate Orientation Seminar Parade of Faculty, UF Dept of Biology
- 2015 ZOO 6927 *Marine Biology Seminar*, (spring/fall semesters). Whitney Lab, St. Augustine

- 2014 EML 4220 *Vibrations*, UF Dept of Mechanical and Aerospace Engineering (lecture)
- 2014 ZOO 6927 *Marine Biology Seminar, (spring/fall semesters)* Whitney Lab, St. Augustine
- 2013 Mentor, NSF Summer REU student Katelyn Ward (Best Presentation Award, M.A. student, Northwestern University Feinberg School of Medicine's Prosthetics-Orthotics)
- 2013 Mentor, NSF Summer REU Yuzo Yanagitsuru (SICB travel scholarship, started Ph.D. program at UF with fellowship support)
- 2013 Lecturer, Florida Master Naturalist Program, Ripple Effect Ecotours/UF IFAS
- 2013 ZOO 6927 *Marine Biology Seminar, (spring/fall semesters)* Whitney Lab, St. Augustine
- 2012 ZOO 6927 *Marine Biology Seminar, (spring/fall semesters)* Whitney Lab, St. Augustine
- 2012 BIO 135L, *Undergraduate Research: Tropical Biology on a Changing Planet*, Organization for Tropical Studies, Bocas del Toro, Panama
- 2011 ZOO 4926/6456C, *Ichthyology*, UF Dept of Biology (3 credit class)
- 2011 ZOO 6927 *Marine Biology Seminar, (spring/fall semesters)* Whitney Lab, St. Augustine
- 2011 Mentor, NSF summer REU student Lena Chen
- 2011 Research lecture, NSF summer REU
- 2011 Research lecture, UF Neuroscience Club
- 2010 Mentor, NSF summer REU student Julia Olszewski (PhD student, UNC Chapel Hill))
- 2010 GMS 6074 *Comparative and Evolutionary Neurobiology*, University of Florida (lectures)
- 2010 Academy of Biotechnology and Medical Research, Ponte Vedra Highschool (lectures)
- 2010 ZOO 6927 *Marine Biology Seminar, (spring/fall semesters)*. Whitney Lab, St. Augustine
- 2009 ZOO 3713, *Functional Vertebrate Anatomy*, University of Florida (lectures)
- 2009 Mentor, Luis J. Perez, Pedro Menendez High School lab volunteer
- 2009 ZOO 6927 *Marine Biology Seminar, (fall semester)*. Whitney Lab, St. Augustine
- 2007 *Biology of Fishes*, Cornell University (lectures)
- 2006 *Biological Science 1*, Cornell University (lectures)
- 2006 *Biology and Filmmaking*, HPSS S505, Rhode Island School of Design (lecture)
- 2005 *Neural Development and Genetics of Zebrafish*, Marine Biological Laboratory, Woods Hole (TA)
- 2003 *Patterns and Processes in Fish Diversity*, Harvard University (TA, lecturer)
- 2002 *Vertebrate Paleontology*, Bio 139, Harvard University (lecture).
- 2002- *Graduate Tropical Field Biology*, Organization for Tropical Studies, Cabo Blanco, La Selva, Monte Verde Costa Rica (research faculty)
- 2001 *Biology of Fishes*, Bermuda Biological Station for Research (TA, lecturer)
- 2001- *Graduate Tropical Field Biology*, Organization for Tropical Studies, Cabo Blanco, Costa Rica (research faculty)
- 2000 *Patterns and Processes in Fish Diversity*, Harvard University (TA, lecturer)
- 2000 *Advanced Topics in Vertebrate Physiology and Anatomy*, Bio 121. Harvard University (TA)
- 1999 *Patterns and Processes in Fish Diversity*, Harvard University (TA, lecturer)
- 1999 *Structure and Physiology of Vertebrates*, Harvard University (TA)
- 1998 *Physiology*, University of California at Irvine (TA)

Invited Presentations:

- 2023 Collapsing fish swimming biodiversity. Departmental Seminar Series. **Florida Museum of Natural History. University of Florida**, Gainesville FL.
- 2022 Understanding fish locomotion, sensing and behavior. Promotion to Full Professor Seminar, Department of Biology, **University of Florida**, Gainesville FL.
- 2022 The importance of natural behavior and ecology in driving animal locomotion research. **Kavli Institute for Theoretical Physics/QBIO UC Santa Barbara**.
- 2022 Reconstructing the Behavior of Fishes in Complex Environments. Department of Electrical and Computer Engineering, **University of Florida**

- 2021 Biomechanics, Neuroscience and Movement Ecology. **Harvard University** Dept. of Organismic and Evolutionary Biology, Cambridge MA.
- Soft robotics in underwater sensing systems. **Max Planck Institute for Intelligent Systems**, Stuttgart, Germany.
- The efferent neurons of the lateral line system prevent signal distortion and enhances sensing during swimming. **44th Association for Research in Otolaryngology**
- 2020 Liao, J.C. and Angelini, C. iCoast; Coastal Monitoring for Action 2020. **UF Foundation National Board Meeting, Gainesville FL.**
- When flow meets fish: insights into aquatic locomotion. **Dept. of Physics, Vrije Universiteit Amsterdam/ Okinawa Institute for Science and Technology.**
- Fluid-fish interactions: an integrative approach to aquatic sensing and locomotion. Center for Environmental and Applied Fluid Dynamics, Dept. of Mechanical Engineering, **Johns Hopkins University**
- 2019 Sensorimotor transformations and energetics in aquatic locomotion. **Monterey Bay Aquarium Research Institute**
- Hair cells and vortex streets: understanding how fish sense and exploit flow. **Hopkins Marine Lab, Stanford University**
- Attack and Evasion Workshop: **Kavli Institute for Theoretical Physics UCSB**
- Life in flow: neurophysiology and biomechanics of aquatic locomotion. Department of Biology, **University of Montana.**
- The biomechanics and neuroscience of fish swimming in unsteady flows. Department of Civil Engineering. **University of Auckland**
- 2018 Fish swimming: insights and challenges in biological fluid-structure interactions. **Fluid Structure Interactions Workshop, School of Engineering and Information Technology**, University of New South Wales, Canberra, Australia.
- Modulation of lateral line afferent neuron activity during motor behaviors in larval zebrafish. **41st Association for Research in Otolaryngology**, San Diego, California.
- 2017 Lateral line function; insights from electrophysiology and optogenetics. **Zebrafish Neural Circuits and Behavior Workshop**, NIH, Maryland D.C.
- Locomotion of salmonids in turbulence; feeding, energetics and mechanics. **NOAA NMFS** Santa Cruz, California.
- How fish sense and exploit flows. **Marine Technology Society TechSurge Meeting**, Norfolk Virginia.
- Hair cells systems in basal vertebrates. **Hearing Research Center Symposium**, Dept. of Speech, Language and Hearing Science, University of Florida, Gainesville.

- 2016 Sensory and motor physiology in fishes: from single neurons to behavior. **Center for Exercise Science** Seminar, Dept. of Applied Physiology and Kinesiology, University of Florida, Gainesville.
- Mechanisms of vertebrate behavior. **Department of Biomedical Engineering** Seminar Series, University of Florida, Gainesville.
- 2015 Understanding mechanisms of fish behavior across levels of biological organization. **Biology Department University of Florida**, Gainesville.
- How fish swim. **Daytona State College** STEM Seminar Series, Daytona, FL.
- How fish swim and sense flow. Dept of Mechanical Engineering, **NYU Polytechnical University**, Brooklyn, NY.
- 2014 Passive vortex exploitation in a cylinder wake. Auckland Bioengineering Institute, **University of Auckland**.
- How fish swim in turbulence. Institute of Marine Science and School of Biological Sciences. **University of Auckland**.
- 2013 Biomechanics and sensory biology of fish swimming. Department of Biology, **Brooklyn College**.
- 2012 Fluid-fish interactions: insights from energetics and behavior. Courant Institute of Mathematical Sciences, Applied Math Lab, **New York University**.
- 2011 Understanding the mechanics and control of fish swimming using optical, genetic and electrophysiological techniques. Department of Biology, **University of Miami**.
- 2010 Trout use less oxygen in turbulent flows: evidence for an energetics hierarchy. **International Leverhulme Workshop for Fish Passage**, Winnipeg, Canada.
- Metabolic cost of trout swimming in vortical flows. **American Society for Ichthyologists and Herpetologists**, Providence R.I.
- 2009 Understanding how fish sense and exploit flows using optical, genetic and electrophysiological techniques. Department of Theoretical Biology, **University of Groningen**, Netherlands.
- How To Catch More Fish: Insights from Biomechanics. **Evenings at the Whitney Lecture Series**.
- Links between marine science and human health. **Whitney Docent Training Program**.
- How fish swim. **Whitney Public Open House Lecture**.
- Understanding underwater locomotion. **Valdosta State University**.
- 2008 Neuromechanics of fish locomotion. Department of Engineering Science and Mechanics, **Virginia Polytechnic Institute and State University**.
- Organismal and cellular approaches to understanding vertebrate behavior. Dept. of Biology, **University of New Orleans**.

The mechanics and sensory biology of fish swimming. Dept. of Biology, **University of Wyoming**.

2007 How fish encode and exploit flows in a Karman vortex street. Courant Institute of Mathematical Sciences, **New York University**.

Physiology of flow exploitation; implications for hydraulics and ecological habitat modeling **U.S. Army Engineer Research and Development Center**, Vicksburg, MS.

Biomechanics and neural control of adaptive behavior in fishes. Dept. of Integrative Biology, **University of Guelph**, Canada.

Optical, genetic, and electrophysiological approaches to understanding neural circuits in larval zebrafish. Dept. of Biology, **University of Las Vegas**.

2006 Wu wei: the Tao of environmental vortex capture by fish. Sibley School of Mechanical and Aerospace Engineering, **Cornell University**.

Using larval zebrafish as a model system to understand vertebrate sensorimotor systems. Dept of Biology Seminar. **Hawaii Institute of Marine Biology**.

Fluid dynamics, physiology and sensory ecology of fishes swimming in perturbed environments. Dept. of Biology , **Scripps Institute of Oceanography/ University of California at San Diego**.

Optical, genetic and electrophysiological approaches to understanding vertebrate sensorimotor systems. Dept. of Biology, **Indiana University**.

2005 Mechanics and control of fish swimming in turbulent flows. Dept of Biology, **UNC Chapel Hill**.

Vortex exploitation in fishes. Dept. Neurobiology and Behavior, **Cornell University**.

2004 Mechanics and control of vortex capture in swimming fishes. Machines and Organisms Group (IGERT), **Cornell University**

2003 The Kármán gait: implications for passive thrust generation in a vortex street. Dept. of Integrative Biology, **University of California at Berkeley**

To surf or swim? How fish hold station via vortex exploitation. Dept. of Biology, **University of Massachusetts**.

2002 How fish use vortices. **University of Guelph**, Ontario, Canada.

Service:

2023 GTM NERR Fish Technical Advisory Group Workshop

2023 Whitney Lab Graduate Student Brown Bag discussion series

2022 Letter writer, Tenure and Promotion Dept. of Ocean and Mechanical Engineering, Florida Atlantic University

2022 Program Officer, SICB Division of Comparative Biomechanics

2022 Panel Speaker, NIH Brain Behavior Quantification and Synchronization (BBQS) workshop on March 1 – 2, 2022

2021 Research Faculty Search, Whitney Lab for Marine Bioscience

2021 Discussion Leader, Mechanics in Physiological Systems: From Organelle to Organism. HHMI/Janelia Research Campus

2020- present Inclusion, Diversity, Equity and Accessibility Committee, Dept Biology UF

2020- present Inclusion, Diversity, Equity and Accessibility Committee, Whitney Lab
2020 NSF Panel, IOS Physiological and Structural Systems Cluster Oct 19-21 2020
Diversity Equality and Inclusion Committee, Dept Biology UF
NSF Jumpstart SICB conference
Diversity Equality and Inclusion Committee, Whitney Lab
Graduate Climate Committee, Dept Biology UF

2019 TEDxUF Salon, Invited Discussion Leader "The Modern Explorer"
Organizer, SICB Public Affairs Committee "Persuasive Communication: When Acting Meets Science" Workshop

2017-2019 Chair, Whitney Lab Bioengineering/Neuroscience Faculty Search

2017-present Advisory Council, UF Biology Dept.

2017-present Whitney Graduate Student Coordinator

2017-2020 Public Affairs Committee, *Society for Integrative and Comparative Biology*

2017 Molecular Neuroscience Faculty Search, UF Biology

2016 Research Faculty Search, Whitney Lab for Marine Bioscience

2016 UF Pre-eminence Faculty Search in Neuroscience, UF Biology

2015 Research Faculty Search, Whitney Lab for Marine Bioscience

2015 NSF IOS full proposal ad-hoc reviewer

2015 Judge, The Ocean 180 Video Challenge, Florida Center for Ocean Sciences Education Excellence (COSEE)

2014 NSF Panel Reviewer, IOS Neural Cluster (Washington, D.C.)

2014 Chair, UF Seahorse Key Marine Lab Director Search

2014 Best Student Presentation Judge Division of Comparative Biology (DCB), SICB

2013 Moderator, Neuroethology Gordon Research Seminar, VT

2013-16 UF Biology Graduate Awards Committee

2013 Whitney Lab Research Seminar Series Coordinator

2013 Whitney Lab Seawater Lab Planning and Development

2013 NSF Pre-proposal Grant Committee, IOS Neural Cluster

2013 Chair and Judge for Best Student Presentation, Division of Vertebrate Morphology (DVM) and Division of Comparative Biology (DCB), SICB

2013 Whitney Website/Outreach Committee

2013 Underwater webcam development, Ocean Classrooms

2012- Review Editorial Board, *Frontiers in Aquatic Physiology*

2012- Harvard College Undergraduate Admissions, NE Florida Recruiter and Interviewer

2012 Director Search Committee, Whitney Lab

2011-13 IACUC officer, Whitney Lab

2011 Judge for Best Student Presentation, Division of Vertebrate Morphology (DVM) and Division of Neurobiology (DNB), SICB

2011 Co-organizer, Southeast Nerve Net Conference

2011 Judge, Best Student Presentation, Southeast Nerve Net Conference

2011 Judge, Best Student Presentation, UF Marine Biology Symposium

2010 Bioinformatics Faculty Search Committee, Whitney Lab

2010 Faculty Panel Discussion Member, UF Department of Neuroscience Retreat

2010 NSF IOS full proposal ad-hoc reviewer

2010 Judge, Best Student Presentation, UF Marine Biology Symposium

2010 Judge, Best Student Presentation, Southeast Nerve Net Conference

2009 Anatomy and Physiology Lecturer search committee, UF Biology Department

2005 Judge for Best Student Presentation SICB, Division of Vertebrate Morphology (DVM)

2002-03 Graduate Student Representative, Dept of Organismic and Evolutionary Biology, Harvard University

2000-03 Undergraduate Tutor in Biology (non-resident), Dunster House, Harvard University

2000-02 Foreign Student Representative, graduate School of Arts and Sciences, Harvard University

Professional Experience:

2021	Co-mentor NIH K-99 Andrea McQuate (Ph.D. U. Washington)
2020	Author, How Fish Work . Princeton University Press (book contract 5/20-5/21)
2017	Panel Member for screening of "A Plastic Ocean," US Green Building Council FL Chapter
2017	Harvard University Interviewer, Northeast Florida
2016	Sunrise International Rotary Club Member
2015	CreateTech Conference NYC
2013	Student, Upright Citizen's Brigade, Improvisation I, NYC Consultant, Science Daily, Canadian TV Program
2008	Screen Actors Guild (SAG) eligible
2006	Student, Meisner Technique (2 years), Ithaca Actor's Workshop
2004	Student, Neural Systems and Behavior, Marine Biological Laboratory, Woods Hole MA.
2003	Consultant, M.I.T. Leg Lab
2001	Consultant, Hall of Ocean Life exhibit, American Museum of Natural History
2001	Scientific Diver, Bermuda Biological Station for Research
2001	Student, Biology of Fishes, Bermuda Biological Station for Research
2000	Student, Human Gross Anatomy, Harvard Medical School
2000	Student, Phylogenetics Workshop, Bodega Marine Lab, UC Davis.
1997	Fisheries Technician, Mote Marine Laboratory
1997	Field Ecologist Intern, USGS Biological Resources Division, Hawai'i
1996	Marine Ecologist Intern, The School for Field Studies, British Columbia
1995	Semester abroad, James Cook University, Townsville Australia
1993	Student, Shoals Marine Laboratory FMS I, Cornell University
1991	Student, Humpback Whale Ecology, The School for Field Studies
